GrievanceHub

Digital Grievance Redressal System

Test Document

Test Cases, Execution Results & Summary

Prepared by: **Shantanu Shrivastava**

Date: April 2026

MP Online Internship Project

1. Testing Overview

Attribute	Details
Project Name	GrievanceHub - Digital Grievance Redressal System
Testing Type	Functional Testing, API Testing, UI Testing
Testing Tools	Swagger UI (FastAPI /docs), Browser (Chrome), Manual Testing
Test Environment	Backend: localhost:8000 Frontend: localhost:5173 DB: MySQL local
Total Test Cases	16
Passed	15
Failed	0
Skipped / N/A	1

2. Authentication Test Cases

TC ID	Test Case	Input	Expected	Actual	Status
TC-01	Register new user	Valid name, email, password	User created, 200 OK	User created successfully	Pass
TC-02	Register - duplicate email	Email already in DB	400: Email already registered	400 returned correctly	Pass
TC-03	Login with valid credentials	Correct email + password	JWT token returned	Token returned correctly	Pass
TC-04	Login with wrong password	Correct email, wrong password	401 Unauthorized	401 returned correctly	Pass
TC-05	Access protected route without token	No Authorization header	401 Unauthorized	401 returned correctly	Pass

3. Grievance Submission Test Cases

TC ID	Test Case	Input	Expected	Actual	Status
TC-06	Anonymous grievance submit	Title, desc, name, email (no token)	Ticket ID returned	GH-YYYYMMDD-XXXXXX generated	Pass
TC-07	Submit without title	Empty title field	422 Validation Error	422 with field error	Pass
TC-08	Logged-in grievance submit	JWT token + title + description	Grievance linked to user	Saved with correct user_id	Pass
TC-09	Ticket ID format check	Any valid grievance submit	GH-YYYYMMDD-6CHARS	Format verified correct	Pass

4. Ticket Tracking & Admin Test Cases

TC ID	Test Case	Input	Expected	Actual	Status
TC-10	Track valid ticket	Correct ticket ID	Grievance details shown	Details displayed correctly	Pass
TC-11	Track invalid ticket	Wrong ticket ID	Error: Ticket not found	Error toast shown correctly	Pass
TC-12	Admin login access	Admin credentials	Admin dashboard accessible	Dashboard loads with stats	Pass
TC-13	Citizen cannot access admin	Citizen JWT on /api/admin/...	403 Forbidden	403 returned correctly	Pass
TC-14	Filter grievances by status	Click Open filter button	Only open grievances shown	Filter works correctly	Pass
TC-15	Update grievance status	Admin changes status + remarks	Status updated in DB	Updated and visible in UI	Pass
TC-16	Dashboard stats accuracy	Check stats vs DB count	Stats match actual counts	Verified manually	N/A

5. Test Summary

Category	Total	Passed	Failed	Notes
Authentication	5	5	0	All auth flows working correctly
Grievance Submission	4	4	0	Anonymous and logged-in both work
Ticket Tracking	2	2	0	Track by ID works; error handling correct
Admin Dashboard	5	4	0	TC-16 was manual DB verification
TOTAL	16	15	0	1 test was manual verification (N/A)

All critical functional requirements have been tested and verified. No blocking bugs were found. The system behaves as expected across all major user flows.
