4. Common Errors & Solutions

Error	Cause	Solution
Ticket not found	Wrong or mistyped Ticket ID	Check the ID carefully - it is case-sensitive
Email already registered	Account with same email exists	Use different email or login with existing account
Invalid credentials	Wrong email or password	Re-enter credentials carefully
Validation Error (422)	Required fields left empty	Fill all required fields before submitting
Unauthorized (401)	Accessing protected page without login	Login first and try again
Forbidden (403)	Citizen account on admin routes	Only admin accounts can access admin panel

5. Tips

- Always save your Ticket ID after anonymous submission - there is no way to retrieve it later without it.
- Provide a clear and detailed description so admins can resolve complaints faster.
- Check back on Track Ticket page after 2-3 days for a status update.
- Register an account if you are a regular user so all your grievances are in one place on your Dashboard.
- Use a valid email when submitting anonymously so admin can contact you if needed.
